

HAWKES BAY CREMATORIUM

HASTINGS

Location

Hastings Cemetery

Program

New Crematorium and Chapel

Time of Project

Start 2015 - under construction

Client

Hastings District Council

Value of Project

\$1,000,000.00

Project Team

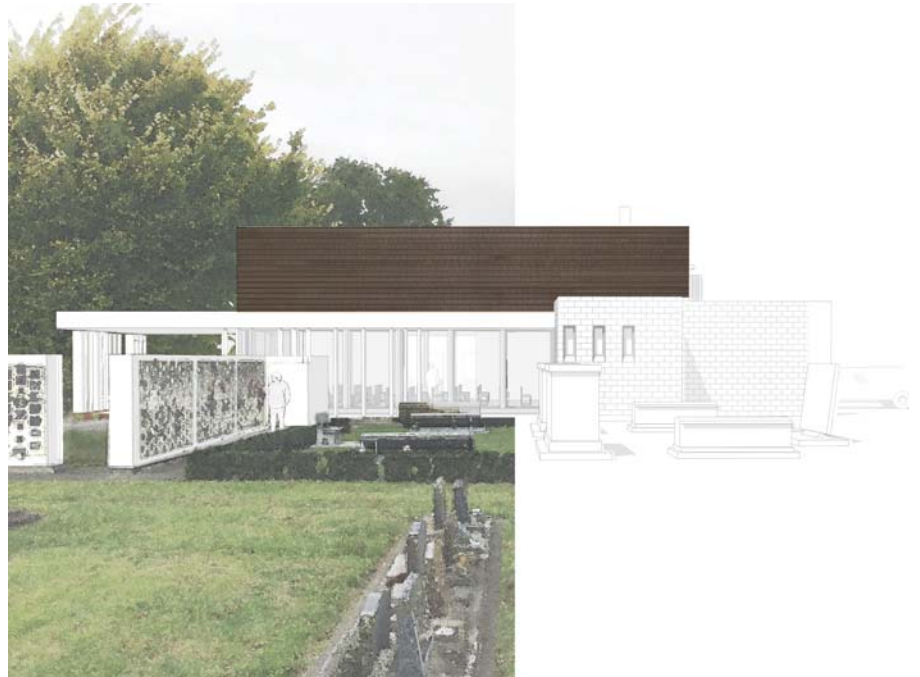

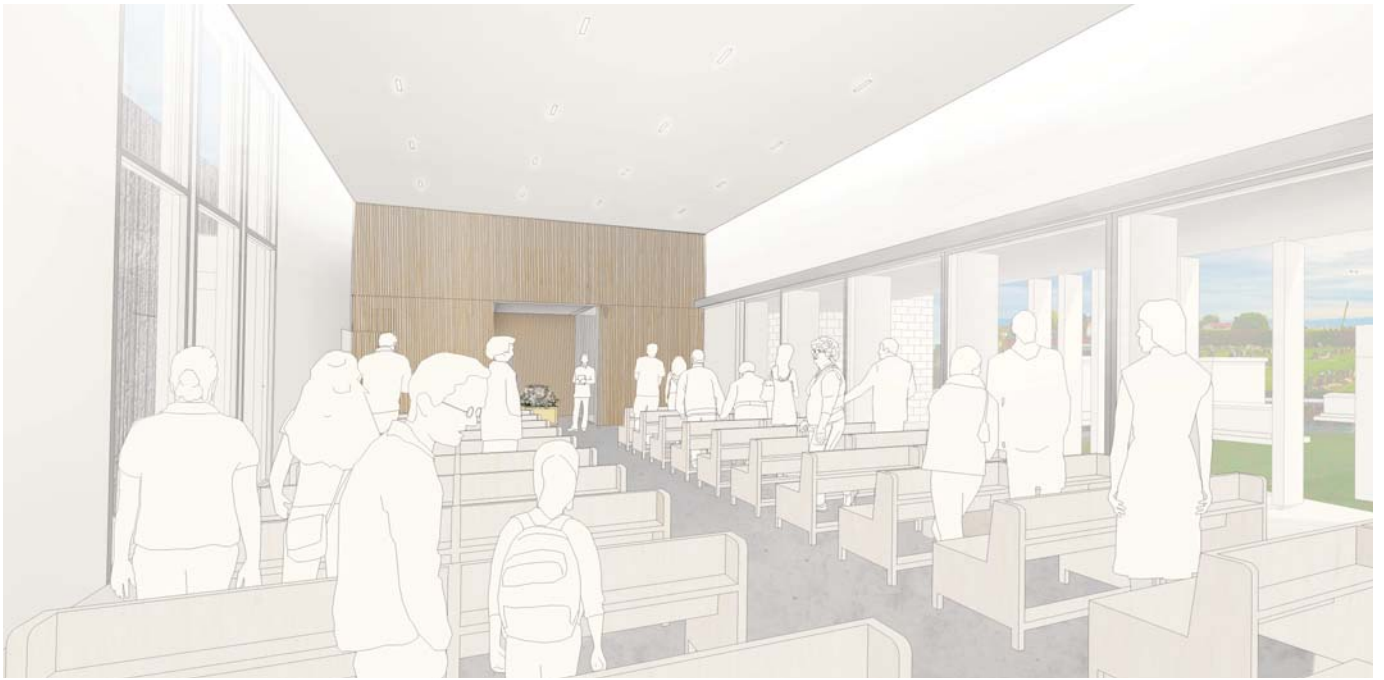

Craig Moller. Kasia Piore, Shaneil Narsey

Project Description

The new Hawkes Bay Crematorium replaces an existing facility on the site in the same location in the existing cemetery. The project consists of a chapel for funereal services, a building to house the new crematory with associated facilities and public toilets. The project needs to be located, designed and constructed to allow the existing crematory to remain in place until the new crematory is commissioned. The project provides for a replacement for an existing building with seismic issues and services both the municipality as well as the multiple funeral directors of the Hawkes Bay region.

Innovation in Design

The project is innovative in providing a space in a contemporary setting for the funeral services that now accommodates AV presentations and lighting as well as providing for a long term future for the crematory of the Hawkes Bay region
